

the art of sound
ARTISON®

Mezzanine 8

Artison's latest surround channel uses the same high quality components as the front channels, delivering the same level of performance. The tweeters are sixty degrees to one another, making them hard to localize while maintaining the effect of being there. The grills are flush to the wall and magnetically attached, easily painted to match any environment. They have a completely enclosed rear cabinet, for better performance and reduced sound transfer. Our unique hybrid acoustic design is Monopole below 3 KHz where you want "Steering Ability" for action and reality scenes, and Dipole above 3 KHz where you don't want to be able to locate the source of the sound. This small, affordable, high performance surround can with-out doubt impress the most critical customer.

Mezzanine 8

- High quality components, acoustically matched to our front channels
- Out of phase tweeter design for difficult localization, yet accurate sound
- Glass fiber ABS rear cabinets, eliminates sound transfer to other rooms
- Square or round flush grills to match your installation needs
- High performance sound to impress any customer
- Gold spring loaded binding posts
- Easy Retrofit Installation
